Apples 5 lbs. .25c Pot Roasts over 8 lbs. per lb. .9c  
We have a supply of fresh Bacon, Bologna and Cottage Roll. Let us fill your harvest needs.

**CHINOOK MEAT MARKET**

## Local Newslets

Mr. and Mrs. C. Fanenga and sons, Donovan, Therlow and Blaine, of Hammil, So. Dakota, visited at the home of Mr. and Mrs. Suiter, of the Rearville district, on Monday and Tuesday. Mr. and Mrs. Fanenga were friends and neighbors of the Suiter's in S. Dak.

Mrs. E. C. Pfeiffer visited for a few days at the home of her mother Mrs. Bayley.

Miss Royal Mitchell, of Drumheller, who has been spending her vacation at the home of Mr. and Mrs. H. R. King, of Kimmund, her sister Miss Alverna, who has been spending the month of Aug. with Mrs. W. E. Andersen, mentioned with Mr. King in their home where they will attend high school.

Mrs. Massey and family moved to town for the winter where the family will attend school.

Mr. Burfield, Engineer of Water Resources department is in the Coliholme M. D. looking Dam locations.

Mrs. Robinson and Lois who have been visiting with friends and relatives at Trail, B. C. and Calgary returned last week.

Miss Mary Edler of Youngs town and Miss Agnes Bunney, of Rearville district, arrived here on Monday where they will attend high school taking grade X.II.

The Ladies' Card Club met Tuesday night at the home of Mrs. Todd. Mrs. Pfeiffer and Mrs. Massey shared the honors. The Club will meet Thursday night next week at the home of Mrs. Youell.

Miss Mae Todd returned home Friday after spending a holiday at Calgary, Lethbridge and Edmonton. She returned to Oyen Monday.

Miss McManus, of Eyremore arrived Tuesday morning in Chinook and will teach school at Laughlin.

Mr. and Mrs. W. S. Lee and family were Kindersley visitors on Monday.

Mr. Harry Johnston was a Drumheller visitor over the week end.

## Debt Adjustment Act Becomes Effective

OTTAWA, Aug. 31.—(C. P.) Today the farmer's Debt Adjustment Act becomes effective in the provinces of Manitoba, Saskatchewan and Alberta. Passed at the last session of parliament, the legislation is designed to give to the debt-ridden farmer an opportunity of making arrangements and adjustments with his creditors which will permit him to stay on the land.

## Beatty Outlines Drouth Remedies

C. P. R. Chief Says Solution Lies in Soil Conservation and Water Development

MOOSE JAW, Sask., Aug. 30.—(C. P.)—"The problem of the drouth areas in Southern Saskatchewan cannot be solved by moving the people to other parts of the province. This would be unfair to the people involved, unfair to the drouth areas and a great mistake for the province," said E. W. Beatty, chairman and president of the Canadian Pacific Railway Company, in an interview here Monday.

"The solution of the problem lies rather in the government standing by the farmers with required assistance to bring them through the emergency, coupled with soil conservation on lands adapted to grain growing; and development of grazing land for grazing purposes, and a policy of water development and conservation for use on the farms," Mr. Beatty said.

By water conservation and development, Mr. Beatty explained, he did not mean large schemes for irrigation works, which experience in this country had shown to be too expensive for the returns possible, but rather development of adequate water supplies for farm use, including stock growing.

## BULLETIN

OTTAWA, Aug. 22.—(C. P.)—Because of the shortage of hay and straw in many parts of Canada particularly the west the government will take steps to regulate exports, by license it was learned here officially today.

The Consolidated School opened on Tuesday, Sept. 4th, with all the teachers present. The following teachers being the staff: Mr. Meier, Mr. Elford, Miss Jensen and Miss Cain.

Mr. Lorne Proudfoot, M. L. A. left for Edmonton on Wednesday.

Miss Ruth Bowd who has been visiting with relatives at Winnipeg returned last week.

Mr. Wesley Seeger has taken over the Barber Shop and Pool Hall.

The infant baby of Mr. and Mrs. E. Blagen passed away on Sunday.

Mr. and Mrs. Homer Butts and family moved to Hanna on Saturday where Mr. Butts has become a partner of the Hanna Barber Shop and Pool Hall. It is much regretted by the people the Chinook district that they found it necessary to move. All join in wishing them prosperity in their new home.

## Chinook Consolidated School Board meeting

The Board of Trustees of Chinook Consolidated S. D. met in the school on Monday evening, Aug. 20th. All the members present.

The minutes of last meeting were read.

Connor—That these minutes be adopted as read.

Then followed the reading of correspondence and of bills presented for payment.

Rosenau—That payment of the following bills be approved: Banner Hardware, linoleum for steps \$45.82

C. W. Rideout, stamps and envelopes 12.05

Herald Pkg. Co., ads. 3.00

C. N. R. freight on roofing cement 15.87

Service Garage, on acct. 19.75

F. Pfeiffer cultivating trees 3.60

Empire Lumber Co., on account 27.90

Lorne Proudfoot, phone, 45

Chinook Trading Co. 25

Chinook Advance, printing and advertising 19.00

Franklin Paint Co., roofing, cement and etc. 142.32

Rosenau—That taxes on building lot used by Collholme M. D. as office be cancelled.

Dressel—That following arrangements be made for van-driving

Route 2,—W. W. Isbister, September 4-29

" 3—Jas. Young, Sept. 4 Oct. 12

" 4—O. O'Malley, Sept. 4 until further notice

" 5—E. C. Pfeiffer, Sept. 4 B. J. Orrison, Oct. 1 Oct. 31

" 6—Jno. Neeb, Sept. 4-29

" 8—R. Peyton, Sept. 4-7

Bell—Adjourn till Monday evening, Sept. 10, at 8 o'clock.

Lorne Proudfoot, Sec.

Puffed Rice 2 pkts for .25c  
Good Fly Coils 1 dozen for .20c  
Maxwell House Coffee 1 lb. can .47c  
Mixed Jam 4 lb. pail .39c  
Tomatoes per basket .20c

School Supplies of all kinds

## OGDEN'S "Cuts well that Smokes Well"

by LOU SKUIE

OGDEN'S  
CUT PLUG

## Soviet Claims Scouted

Claims from Moscow that Russia had usurped second place among the world's gold producing countries, superseding Canada, has been received with almost universal skepticism. Apparently, the statement has been interpreted as just another of those efforts in propaganda with which Soviet authorities key their nationals to further sacrifices, but which singularly fail to impress the outside world.

During progress of the first five year plan, Moscow deluged the world with claims of amazing achievement, which, now that the ardors of the period have subsided, are being assessed at their true worth. There is no gainsaying the great advances made in certain industries, particularly the so-called heavy industries, under the program initiated by Lenin and carried into effect by Stalin. In some instances these have been spectacular, but (and this is the rub) seldom have they been quite as significant or outstanding as the claims made concerning them.

Several of the leading magazines and newspapers of Britain and America are devoting considerable space to reviewing the Soviet industrial and agricultural achievement. These have been equitable, unprejudiced and, probably based upon the true facts, for truth and not antagonistic propaganda is what the public seeks these days. The claims made on behalf of socialized endeavor by proponents of Socialism of the Russian variety, apparently do not stand the test of statistical investigation. Alan Monkhouse, one of the British engineers sacrificed for propaganda purposes in the notorious sabotage trials of a year or so ago, in a book of his experiences in Russia is surprisingly sympathetic to the Soviet planning scheme in the light of the circumstances preceding his deportation. Paying some attention to the statistical record of industrial achievement, he shows that the Soviet government's own figures in specialized lines such as house building do not compare favorably with similar achievements in capitalist and individualistic England, recorded at the same time. He cites several particulars in which Soviet authorities claimed to have out-distanced their degenerate and collapsing capitalist contemporaries, which are not substantiated by the facts.

Apparently, the same is true of the gold production, backed by Russia threats that, having overtaken Canada they will shortly overtake and pass South Africa in production of the precious metal. In reply to this, Canadian mining authorities maintain that, while undoubtedly Russia has been creeping up in production, it has not yet supplanted Canada as ranking second in production of newly mined gold. Most of the Russian gold, it is claimed, was withdrawn from hoarding and, therefore, it is old gold reclaimed.

South Africans scoff at what they term a bombastic claim, and have no fear of losing premier place among the world's gold producers. This contention is backed by Dr. P. S. Nazarov, formerly a famous Russian geologist and now a fugitive from the Bolsheviks. His statement, based on actual knowledge of the various Russian goldfields and not upon political bias, is to the effect that nowhere in Russia do gold-laden bodies occur with the regularity and in the volume seen on the Rand in South Africa. "If Russian gold fields ever reach the stage of providing competition for South Africa it will be at tremendous cost of time and labor of transportation," he concludes.

## Salvaging Gold From Chimney

U.S. Assay Office Reclaims It From The Soot

Since the U.S. government devaluated the dollar, almost doubling the dollar value of every scrap of gold, the Assay office in New York has been using every conceivable precaution in its melting room to conserve the metal. The Assay Office is housed in a relatively new building, white and severe, at the corner of Old Slip and South Street. One of its important installations is called a fume precipitator—in reality, a series of metal sleeves, each plumed by a chain. Alternating currents run through the chains and the sleeves; and, as smoke passes up the chimney, the soot particles, containing minute quantities of gold, are dashed from the air by this electric barrier, and fall to the bottom of the flue. This precious residue is collected once or twice a year by men who go into the basin of the chimney and shovel it out. The Assay Office realizes \$10,000 to \$15,000 on the sale of gold reclaimed from chimney soot. Even the dust on the walls is collected for gold.

## Easy To Remember

The debate over "I" and "me" goes on unendingly, but there is one thing that we ought to stop. It is the phrase, "between you and I." If the people who use it would reverse the pronouns and say "between I and you," they might learn to use the correct form, but every day we hear from the most unexpected sources the heart-rending "between you and I." The correct form, of course, is "between you and me."

## Drugs In Garden Flowers

Many Are Valuable For Something Apart From Beauty

Most gardens contain at least one flower whose value to mankind is not to be estimated simply in terms of beauty. The leaves of the state foxglove yield the drug digitalin, which still has no superior as a cure for heart disease or dropsy. The crocus is the basis of a preparation for gout sufferers, and the lobelia tenders good service as a balm for whooping cough. Then what a siren is the monkshood! Its attractive blue flowers contain a deadly poison, aconitine, one-sixteenth of a grain of which will kill a man. But like other garden drugs, this virulent member, scientifically controlled, is invaluable in the treatment of fevers and acute neuralgia.

## Money For National Parks

One Million Dollars Has Been Authorized For This Purpose

Expenditures totalling more than \$1,000,000 for projects in Canada's national parks have been authorized by the Dominion government, with individual amounts ranging from \$2,000 to \$175,000, the last embraces projects in practically all of Canada's western park playgrounds. It is provided that some of the work will be done by contract and the rest day labor.

Prince Albert National Park, Saskatchewan: Construction of buildings, museum, garage, recreational and staff quarters, \$25,000.

One-fifth of the people of the earth live in Africa.

## Was In Two Rebellions

Alberta Veteran Carried Despatches For General Strange

In Alberta 50 years ago, when highwaymen were just fading from the western frontier with the coming of the first Northwest Mounted Police, and when Indians were still on the warpath often, Charles F. Stewart drove the mail stage. Now 69 and retired, he lives at Edmonton.

Native of the prairie, he saw two rebellions at first hand. By the chief factor of the Hudson's Bay Co. he was a lad of eight and lived a few miles below Fort Garry (later Winnipeg) in the troubled days of the first Red River rebellion. He can recall seeing the soldiers coming up the Red river. As a youth of 20, when the mails were stopped by the Saskatchewan rebellion of 1885, he went on the courier line, carrying despatches for General Strange's Alberta field force. He made several trips on horseback between Saddle Lake and Fort Pitt.

His predecessor on the mail job, Peter Campbell, was on the driver's seat when the Calgary coach was held up and the mails robbed by highwaymen in the only case of its kind in this part of the west.

It was no picturesque coach that was in use in 1891 but a lumber wagon with an open centre for package freight and a closed cabin on the rear that carried about six passengers. An average of 40 miles of trail was covered each day by the plodding team and numerous creeks and streams were forded on route.

## Proposed Tax On Noise

Idea Of British Minister Of Transport May Save Nerves

A tax on noise is proposed to save the nerves of the people of the United Kingdom. It is thought that taxation may succeed where all appeals have failed in the matter of unnecessary noise, and the suggestion of a tax was made in a letter from Leslie Hore-Belisha, minister of transport, which was read at a conference of the Anti-Noise League at Oxford. "All new motor cars put on the road since January, 1933, have to be fitted with pneumatic tires," he wrote, "and the scales of taxation have been so framed as to give a strong incentive to people to substitute pneumatic tires on existing vehicles. The heavy vehicle on solid tires which caused so much unnecessary noise in the past is rapidly disappearing."

"Regulations also forbid the use of motor vehicles and trailers which have caused excessive noise, and the soundings of horns on stationary vehicles. "The road traffic bill proposed further to prohibit the use of the horn in prescribed hours and zones of silence." Mr. Hore-Belisha stated that in order to gain exact knowledge of what really causes noise the ministry has invoked the best scientific assistance. He expressed the hope the motor manufacturing industry will co-operate with the government in a determined effort to find a remedy for present unnecessary and harmful noises.

## Rebuilding Viking Boat

Oak Timbers Intact After Being Submerged Thousand Years

A Viking boat has been "reconditioned" at Danzig, after one thousand years. Workmen engaged in digging a ditch at Oliva found the remains of the boat only five feet beneath the surface of the ground. The sturdy oak planks of which the boat was originally made had decayed but it has been possible to reconstruct the vessel in its entirety. The boat is thirty feet long, with places for eighteen oarsmen. Iron nails had been used in the making, as well as wooden pegs. Parts of the gunwales, with the original rowlocks, have survived, and much of the nose with which the seams were packed to make them water-tight is still in place.

Wine must come from a limited area of France to be legally called champagne.

## Talk About Economy

Two Towns In Bulgaria Have Everything Else Beaten

There is a legend current in the picturesque little Balkan town of Pangharishate that when God once was bestowing his gifts, he allotted close-fistedness to the inhabitants of two towns—Gabrovo and Pangharishate, affording it more generously on the latter because of its weird and unpronounceable name.

On that account the parsimoniousness of either town has become proverbial. And they are dire rivals in that respect to this day.

In both localities men do not shave their beards, being too expensive a matter, but since them by various devices which makes the beard stay smooth. In both towns families make use of but one spoon or fork, passing either of them around when taking their meals which they argue, saves extra labor, and what is more important, food lasts longer, as each member of the household thus must avoid another turn for a mouthful.

The aged people say that this method of eating prevents one from overeating, saves him from indigestion and many other stomach ailments, due, they assert, to the use of too many spoons, forks, knives, and too many dishes.

In both towns hats and shoes are considered a superfluous luxury, which may be resorted to only in winter and on holidays. And even on those occasions people often prefer carrying their hats and shoes in their hands to save tear and wear.

## Million Miles Her Objective

Elderly Woman Traveller Expects To Make Real Record

An interesting old lady who can probably lay good claim to the title of world's champion traveller is Mrs. Ella G. Munson of East Rockaway, Long Island, who has sailed from Montreal to add the Saguenay district to her list of places visited. Mrs. Munson has travelled close to 700,000 miles and at 72, hopes to bring her total to 1,000,000.

In all her travels, which include 63 trips across the Atlantic and 10 across the Pacific, Mrs. Munson has never encountered a severe storm nor an accident. She has tried almost every known method of transportation, including camels, elephants and rickshaws, but has never yet been in a plane. Only one thing could induce her to fly, she said, and that was an invitation from Col. Charles A. Lindbergh to go up with him.

Mrs. Munson's trips are seldom planned in advance. She stays at home until the urge to travel comes, then she packs her trunks and is off. "I can get ready to go around the world in 24 hours," she said.

Mrs. Munson was somewhat at a loss to explain her wanderlust, as her ten brothers and sisters are all "stay-at-home bodies," but thought she might have inherited it from Captain John Munson, an ancestor who in 1642 led a pilgrimage of Munsons to Massachusetts.

## Looked The Part

He was a golfer who always played in his oldest clothes. One day he set out for the course, his clubs slung over his shoulder.

Walking down a street he saw a woman leaning over her garden gate, eyeing his approach with a frown.

"You're very late," she said, sharply, as he drew level.

"Late?" echoed the astonished golfer.

"Yes, late! You promised to sweep my lawns at eight, and it's past nine o'clock now."

## Around The World Cruise

Canard White Star Liner To Make Interesting Calls At Many Ports

Preliminary enquiries throughout America indicate that the 1935 Around the World Cruise of the Canard White Star liner Franconia will be well booked up. The Franconia will follow the route around the Southern Hemisphere as she has done during the past two seasons. The liner will leave New York on Saturday, Jan. 12, and sail south for her first port of call at Kingston, Jamaica. Here there will be a drive to Spanish Town and other points of interest for passengers. Leaving Jamaica on the 18th, calling at Cristobal, a daylight passage of the Panama Canal is made, with an auto drive to Colon, Ancon, Panama City and Old Panama.

The Franconia calls at San Pedro in California to allow Westerners to embark for the mainland and also to permit passengers to drive to Los Angeles, Hollywood, Beverly Hills and other famous California resorts.

Crossing the Pacific the Franconia will call at the Hawaiian Islands, where two days will be spent from Feb. 2 to Feb. 10. The itinerary here calls for tours to Hilo and Honolulu, the Lava Tubes, the Kilauea Volcano, the Fern Forest, Diamond Head and Waikiki Beach. An unusual call will be made in the Society Islands at Papeete (Tahiti). Here preparations are being made for entertainment and dancing by natives to amuse the passengers. Cook Islands will be visited two days later and there will be a motor drive in the Island of Rarotonga, with native dancing at Avarua. Recalling the late Louis Armstrong, who will be made to Valima, his home in Apia in the Samoan Islands. The famous "Siva" or native dance will be performed in Apia.

The Franconia then sails on to the Fiji Islands, with a motor drive into the interior, where there will be "Meke" or tribal dances performed. The Franconia will also visit Australia. Five days will be spent in New Zealand, commencing with a motor drive from Auckland, a two days inland tour to Rotorua and the famous Thermal district, with visits to Mount villages. Two days will be spent in Australia, with motor drives in and around Sydney, including visits to the famous beaches, the New Bridge, Koala Bear Farm and the celebrated zoo. A special exhibition of boomerang throwing will be arranged in the Island of Port Phillip. There will be an optional two days trip over the Blue Mountains, Mount Victoria and the Jenolan Caves.

March 11 finds the Franconia at Port Moresby (Papua) New Guinea. From there the Papuan village of Hanabanda will include tribal dances by natives. Another unusual port of call for the Franconia will be in the Lesser South Islands with visit ashore at Kalababang. A day or two will be spent in Bali at Tokod dealing with visit to temples and magnificent scenic points. There will be an exhibition here of native arts and crafts and Balinese dancing. Two days will be spent in Java. There will be an auto drive around Semangar to Batavia and Buitenzorg, visiting the famous Botanical Gardens.

The Franconia will call at Singapore, March 24. There will be visits to points of interest in the Malay Straits, the Botanical Gardens, for instance, and Penang Hill. The Franconia sets sail to South India, arriving at Madras on the 30th and calls at Ceylon early in April. There will be visits in and around Colombo and Mt. Lavinia, as well as to Kandy and the Botanical Gardens. A unique port of call will be Port Victoria in the Seychelle Islands with a motor drive to the Islands of Mahe, where an exhibition of native arts and crafts has been arranged. Kenya Colony is next visited, with a call at Mombasa. A "ngoma" or series of tribal dances will be performed at Kilindi. Next comes Zanzibar and Madagascar, visiting Majunga, one of the most interesting ports in the Indian Ocean. Three days will be spent in the Union of South Africa, with drives in and around Durban and an excursion to Pietermaritzburg, Port Elizabeth and Cape Town.

After leaving Cape Town, the Franconia is at present engaged on a series of cruises between New York and the St. Lawrence, calling at Newfoundland, the Saguenay and Quebec.

## Decline In Cheese Exports

Canada Is Losing Market Of United Kingdom

What has happened to Canada's exports of cheese to the market of the United Kingdom is clearly indicated in a statement of the Bureau of Statistics at Ottawa that during the first six months of the present year our shipments of cheese to that market actually fell to fifth place with only 30,842 cwt. being forwarded across the Atlantic. In contrast with this, New Zealand remained in first place in the British market with 1,316,700, Australia being second with 67,050, the Netherlands third with 61,099 and Italy fourth with 50,928. Two years ago, for the corresponding period, Canada was in third place, coming behind New Zealand and Holland, and prior to the war Canada's supply of cheese to Great Britain was more than double that of New Zealand.

A further statement of the Bureau reports that during the year 1933 Canada's production of factory cheese experienced a further drop, totalling 111,044,628 pounds, or eight per cent. The total value of the cheese made was \$11,113,918, a decrease of two per cent, the average factory price per pound having advanced from 9.44 cents in 1932 to 10.01 cents in 1933. On the other hand, the production of creamy butter in the Dominion rose to 218,532,307 pounds, an increase over the preceding year of two per cent.

It is evident that Canada is continuing to lose her grip upon the British cheese market, where once she was supreme, and if things continue at the present rate it will be only a matter of time before she has been swept off that market by the force of New Zealand's competition.—Brookville Recorder and Times.

## Discover New Rays

Eight Death-Dealing Rays Discovered By Woman Scientist

Eight death-dealing rays of ultraviolet light have been identified by Dr. Florence E. Meier, young woman scientist of the Smithsonian Institution.

The work completed by Miss Meier, hailed as a valuable addition to the important study of animal reactions to various rays, reveals the new killer rays as black sheep of the normally beneficial violet ray group, which are known to cure rickets.

Humans would not be slain by the newly discovered rays, but they are certain death to green algae, the one-celled plants that grow in lakes and rivers.

## Or Even A Horse

"Automobile owners will leave their vehicles unlocked with keys at hand and then complain to the police when someone borrows or steals them," remarks the St. Thomas Times-Journal. Well, why should it be necessary to lock a car, and not a horse and buggy? asks the Woodstock Sentinel-Review.

A new machine determines scientifically how sharp a razor blade is, how much it is dulled by use in shaving, and how successfully it can be resharpened.

## Change of Climate, Diet, Water Often the Cause of Diarrhoea

If you are suddenly attacked with Diarrhoea, Dysentery, Colic, Cramps, Pains in the Stomach, Summer Complaint, or any Losses of the Bowels, do not waste valuable time, but get a bottle of Dr. Fowlers' Extract of Wild Strawberry and see how quickly it will relieve you.

This bowel complaint remedy has been on the market for the past 88 years. Proof enough that you are not experimenting with some new and untried medicine.

Do not accept a substitute. Get "Dr. Fowlers" when you ask for it, and be on the safe side. Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

REDUCING MADE HER  
LOOK YOUNGER

## A Burden Of Fat Gone

Here is another case of youth has displaced the trim, fat out of the middle age. It is a housekeeper writing. She says:

"I cannot say what weight I was, but I was very fat—a burden to myself. I have taken three bottles of Kruschen Salts, and now I am quite slender. I am over 50, and people take me for 40. I am more than proud of myself. You can take it from me that every word of this is true. I took a teaspoonful of hot water every morning till I used three bottles. Now I only take half a teaspoonful each morning. I cannot recommend the Kruschen Salts enough, for they are worth their weight in gold."—Mrs. A. H.

Kruschen Salts combat the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

## OCCASIONAL WIFE

By  
EDNA ROBB WEBSTER  
Author of "Joretta," "Lipstick Girl," Etc.

## SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a commission for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Peter and Camilla are married. After the story are Avis Werth, another wealthy girl who is trying to win Peter. Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive hotel when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip out to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and "Inspiration." Peter adopts the latter title and Camilla, heartless, goes to Peter's studio for quiet work. Peter and Avis follow later, and as the lights are turned on, see the statue has been abandoned. Peter accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope."

and Tiny Tots broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Avis Werth. During the voyage Avis tells Peter that Camilla has renounced the scholarship exhibit in a fit of temper, and he believes her.

(Now Go On With The Story)

## CHAPTER LIX

Camilla did not recognize her visitor for a moment, so long had it been since their last meeting. But after an instant, she recalled his name. "Oh—Mr. Matson, good afternoon."

He extended his hand, even before she offered hers in greeting. Like the clumsy make-believe gentleman that he was. "The very same—Camilla. Lord, but you look swell." His frank glance admired her from head to heel. "And no wonder! Didn't you just go up in a rocket to success? What do you think, I listen to every one of your broadcasts?"

She smiled reservedly. "It's nice to know that someone listens in. But why should you be interested in children's stories?"

"I'm not. I listen just to hear your voice."

Her manner became more aloof. "Is that what you came here to tell me? If it is, I'm rightly busy, Mr. Matson."

"Oh, see here, little fireworks, don't you get so peeved over a little thing like that. No, I came here to tell you something that I think you might like to hear. How about it?"

"Well?" she waited.

"I just heard the other day that they accused you of destroying Peter's exhibit piece."

"Well—I didn't. And Peter knows that."

"Wasn't it that clawish cat, Avis Werth, who accused you of it?"

"What difference does it make if she did?"

"I just thought she might be able to convince him that you did."

"That's a silly thing to bring up now. Peter is on his way to Paris, as you well know."

"So is Avis — and on the same boat," he watched her face closely for the effect, and was gratified with the result.

She grew alarmingly white, as if she had been struck a terrific blow. Her head reeled sickeningly. But she rallied almost instantly and managed to reply bravely. "That's a strange coincidence, isn't it? At least, Peter gives a pleasant company a slow voyage."

"Lord, you're a brick, Camilla. I know how that gets you. You can't fool me. That is why I came here to help you, because I've always been crazy about you and can't bear to see you get a raw deal. Want to know who destroyed the statue?"

She hesitated for a moment. "It would be rather a relief to have the mystery solved."

"Well—I did it."

Her startled eyes met his with amazement. "You? But why—and why should you confess it to me?"

"One at a time, if you're going to give me the third degree," he held up his hand in mock protest. "First, I've told you to give you a square deal. Reason given above. Next, I did it for two reasons: for revenge on Peter for a former little incident which you may recall, and to increase the possibility of my own success. There was no doubt that he was one of my best rivals. That eliminated his chances, I thought, and increased mine by one. The results proved that I was right there. I was the Nels Nelson whose 'Flight' was second and lost the scholarship. So Peter was my best rival, even with a substitute entry." He laughed harshly.

"I may even have bettered his chances by what I did, and hurt my own. Well, he won. Oh, yes—using more. You will wonder how I did it. I slipped upstairs and into his studio that night of the party, and was listening in the lower hall when you were discovered there. I thought it was a lucky break for me." He paused.

"But I still don't understand why you are telling me. No one ever suspected you. Don't you know that I changed and took advantage of it gradually."

"You won't," he said confidently. "Neither would Peter. After all, I have to admit that he's one swell guy. Besides, he won, didn't he? What's his kick? That group probably had more kick in it than a dozen 'inspirations'. But there is more to my story, girlie. Not only did I put Peter where he wanted to be by my rotten trick, but I landed myself in a cloud with a silver lining. Maybe I didn't deserve it, but just the same I am there and riding pretty."

MAKE YOUR FALSE  
TEETH HOLD FAST

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you sprinkle on Dr. Wernet's Powder—they fit snugly—comfortably—they can't slip. Prescribed by world's leading dentists—they keep it the best! Costs but little—any druggist.

"Peter can have all the Paris scholarships he wants—for the good old green. I only wanted to go to Paris to tide over the depression, anyway. First crack after the exhibit, one of the big money kings buys my 'Flight' and gives me an order to do a larger copy for the entrance to the airport. Then I almost collapsed when fortune threw her arms around me again, and a novelty dealer bought the patents on this little modernistic figures that he will manufacture by thousands to put in the five-and-dime stores. What do you say, is that a break or isn't it?"

Her face lighted with genuine admiration. "Indeed it is, and I'm awfully glad for you. I hate to think that you could do a thing like that to Peter—but since it came out all right, there must have been some reason in the whole plan. I'm glad you told me about it, Gus. I appreciate that it does mean something to me. It would have been a dreadful mystery to have hanging over us for all our lives. But don't be revengeful and petty like that again, will you?" Camilla implored him.

"Not on your life, I won't. Me for the straight and narrow—and prosperity."

"I hope it continues for you," she smiled. "You have some fine things in you to develop, I'm sure."

"Gee, but you're sweet. Tell you what, I might even write you a statement of confession to show to Peter sometime, if you will promise me to burn it right away after he reads it. I don't care to have incriminating evidence like that around."

"You don't need to do that. If you wish me to tell Peter, I shall. He will believe me, of course. And he will be relieved to know how it happened. I'm sure he never believed that I did it, anyway."

"Well, I'd advise you to keep your eye on Avis Werth."

Camilla laughed with a deprecating gesture. "Avis doesn't worry me. But she did not believe what he said, and when Gus Matson had gone, she sat huddled under her drawing board in abject misery and despair. Her thoughts leaped the expanse of land and ocean which divided them, and she visioned Avis and Peter on the boat together for hours and days."

Then Peter—Peter a strange and a novice; and Avis as familiar with the city, the customs, the language, as at home. Avis: seductive, amorous, subtle, confident, with everything to her advantage. Angry tears stung in her eyes.

After a night of restless pacing the decks and turning in his upper berth, Peter emerged to a victory over his emotions. With bitter regret and angry resentment, he had slain love; and now looked upon the results dispassionately. Never again would he give rein to his emotions. Never again could he or would he permit himself to love anyone as he had loved Camilla. Work and success were all that made life worth while, anyway.

He would devote every moment, every effort, every emotion to those elements. He would be hard and cold and grasping like the rest of the world—take what he wanted when he wanted it, accept what pleased his fancy, ignore all obligations to sentiment. He suspected that was the creed of all successful men—and women. Well, he would join their ranks.

He thought of Avis with a mounting sense of appreciation and gratitude. He had her to thank for so many things: his financial security, her influence in his behalf, the interests of John Danforth, even the truth about Camilla's unforfeited act.

Three more days of such stern reasoning and gradual resignation to his new creed had done much for Peter's state of mind. Avis had calmly observed this very obvious change and took advantage of it gradually.

She increased her personal attentions to him; made little intimate ventures which became more pronounced as the days passed slowly; played upon her conviction that no matter how much a man renounces love, he is the eternal lover and recipient of love, that he cannot submit without some demonstration of his emotional forces. She flattered and entertained him, exerted herself to be attractive and desirable.

All unconsciously, Peter's attention and ardor transferred themselves to Avis, and almost before he was aware of what was happening, he found himself caught up and hurried along by the mighty force of his desire. Her mistress tantalized him, maddened him; until on that last, magic evening of moonlight and sea breeze, when the emotions were strangely alive and alert with the anticipation of the morning's landing, he found his lips pressed to hers, himself holding her intoxicating fragrance in his arms, and all else oblived.

"But—that man you love," he finally reminded her.

"That man—is you, Peter darling," she confessed.

He was dazed. "Oh—I begin to see light."

She laughed softly. "Dear Peter, you are simply too good to be true. Now that you know—what are you going to do about it?"

"I don't know," she confessed dejectedly.

After a little while, she consoled him. "Oh, well, why think about that now? Tonight is tonight. Tomorrow is another day. Tomorrow, we reach Paris. There is so much to be done. You are going to be very busy. But we can see each other often, and when you are settled, we can have such glorious times together—while we wait." She did not say what they would be waiting for, but it hung in the air between them.

His silence seemed to be an acceptance of her plans.

THE RHYMING  
OPTIMIST

By Aline Michaelis

## THE MAN WHO DREAMS

Who is so wrong as the man who dreams, Trading the real for the thing which seems, Shaping the days in the mold of his dream, Building a world for his whim or his dream? Who is so foolish, so futile as he, Taking the false for reality? Weakly and cowardly well-content With a toy in place of the world God meant?

Waiting, while months and years slip past, Caught in a net that holds him fast, Snared, and bound in the web of dream, Losing the truth of creation's scheme Missing the zest of eager strife, The sweet and toil that are part of life.

Lacking in triumph and mastery, Who is so cheated and fooled as he?

## Prefers Motor Cars

Pope Pius Gives Up Horses And Closes His Stables

The Papal stables, which once had accommodation for sixty horses, have been finally closed down. Pius XI, his cardinals and prelates, have all taken to motor cars. No more will the streets of Rome ring to the tread of the stately coal-black horses which used to draw the carriages of members of the Sacred College. Saddest of all at the change is the Pope's head coachman, or, as he is entitled to be called, "the Holy Father's noble coachman." 80-year-old Rinaldo Jacchini.

## Has Rare Specimens

The Dunedin National museum of New Zealand has two rare and perfect specimens of Moa eggs. These large, egg-shaped birds, resembling the ostrich, only larger, and confined to New Zealand, are thought to have become extinct more than 500 years ago.

Of the 92 known chemical elements, 17 have not yet been found in the free state.

## Persia Cleared Of Beggars

Incurables Sent To Institutions And Able-Bodied Must Work

By a ministerial edict all beggars have been swept off the streets of Persia, the land of the shah, and even from the courtyards of mosques where for centuries since Islam entered the country they have begged for alms.

The lame, the blind and the insane, have been sent to institutions. The able-bodied have been put to work on the new railroad with the option of going to prison with hard labor for three years.

For the work they do they are paid the minimum wage permitted by the state schedule for labor.

Only those who know the East can appreciate the scope of this reform. In Teheran, which has a population of 300,000, there were 22,000 beggars organized into fraternities, guilds and corporations sometimes dating back to the foundation of the city.

Islam forbade any interference with beggars on the grounds that alms are the surest road to paradise. The shah had to tread warily for the mosque courtyard was the beggars' chosen pitch, and the precincts of the mosque have always been sanctuary.

The sovereign determined to make religion see reason, and therefore purged the multitudes of Ispahan, the highest Moslem dignitary, to send a chaplain to accompany him on an incognito tour of beggaredom.

The chaplain saw for himself the enormity of the racket. In due season the multitudes issued his fiat: "It is good to help the poor. It is evil to rob the poor. The beggars of this town are guilty of robbing the poor and must therefore be driven from the sacred precincts of mosques."

The multitudes, a wise and learned doctor of laws, a learned scholar and a Koran enjoined that the insane, the blind, the lame, and the sick should be treated with respect and consideration as being "afflicted by the most high God." It was not possible to respect them in the public places, and therefore they must be put away and tended.

## Under-Sea Experience

Deep Sea Divers Are Blinded By Flashlight Explosion

Blinded for a time by a premature flashlight explosion, two members of the New York Zoological Society's deep-sea expedition spent an uncomfortable five minutes down around the bottom of the sea at Bermuda.

For several minutes after the blinding flash, Dr. William Beebe and his assistant, Otis Barton, could only grope sightlessly around the interior of the great steel ball in which they had been lowered 1,500 feet below the surface.

Sealed in their bathysphere, they had gone down to take photographs of strange sea monsters at that depth. But a short circuit exploded their four flashlight bulbs simultaneously—instead of singly—and their picture-taking was suspended.

By the time the explorers had been hauled back to the surface they had recovered their sight fully and were none the worse for their experience.

## An Interesting Bible

Bible students are interested in a 301-year-old Bible owned by C. S. Cooper, of Windsor, Ontario, which has developed a curious quality of faintly discernible luminousness. Containing all books of the Bible, this volume contains the Apocrypha and one of the first concordances ever published. The type used is English script and very difficult for modern eyes. Mr. Cooper inherited the book from his father, S. Moorehouse Cooper.

Designed to make secure almost anything from a small bottle to a large door, a portable lock about the size of a 25-cent piece may be attached without the use of tools.

## Little Helps For This Week

"The Lord bless thee and keep thee; the Lord make His face to shine upon thee and be gracious unto thee; the Lord lift up His countenance upon thee, and give thee peace." Numbers 6:24-25.

O Love how cheering is Thy ray! All pain before Thy presence flies; Care, anguish, sorrow melt away, Where'er Thy healing beams arise.

O Father nothing may I see, Nothing desire or seek but Thee. —P. Gerhardt.

There is a faith in God and a clear perception of His will and designs which gives to its possessor courage, patience, and a sweet composure under all varied and troubling aspect of events such as no man can realize unless he has felt its influence in his own heart. There is a communion with God in which the soul feels the presence of the unseen One in the profound depths of his own being with a vivid distinctness, and a holy reverence, such as no words can describe. There is a state of union with God, not often reached, but it has been attained in this world, in which all the past, present and future are reconciled, and eternity is won and enjoyed; and God and man, earth and heaven, with all their mysteries are apprehended in truth as they lie in the mind of the Infinite.—Samuel D. Robbins.

## The Man In The Moon

Mythical Tenant Of The Lunar Planet Is Photographed

The man in the moon has posed for his first television snapshot.

After smiling down for years into the world's television lenses, the mythical tenant of the lunar planet has been photographed by television and the picture transmitted to a radio receiver.

Reproduction of the moon's likeness—the first recorded use of television in astronomy—was announced by Philo T. Farnsworth, 28-year-old inventor-scientist of Philadelphia.

SOURD ON THE  
WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and generally weakened make the mistake of taking salts, oil, mineral water, laxative candy or other gummy or roughage which only move the bowels and ignore the liver. What you need is to wake up your liver bile. Start your liver pouring the daily two ounces of liquid bile into your veins. Get your stomach and intestines working as they should, once more.

Carle's Little Liver Pills will soon be up to you. Purely vegetable. Safe. Sure. Quick. Ask for them by name. Refuse substitutes. 50c at all druggists.

## Post Office For Arctic

An Arctic post office just opened in Tikil Bay, on the shore of the Arctic Ocean, will maintain mail connection with Yakutsk (Siberia), 1,000 miles away, using reindeer as the means of transport.

### School Fair

A meeting of the Chinook Dist. School Fair was held on Sat. Sept. 1.

Rosenau, Wilson—That the minutes be adopted as read. Britton, Coutts—That the pupils of Miss Parker's room be given until the day of the fair to complete their art.

Mrs. Shier, Rosenau—That the Sec. write to the dept. in forming them that the livestock has been deleted from the prize list, but that they send a judge capable of judging manual training, poultry, knots grain vegetables and etc.

McDonald, Langley—That all exhibitors making exhibits for the four contributions must make a separate exhibit for each.

Mrs. Shier, McDonald—That the Sports committee be allowed \$15.00 for the sports.

Langley, Coutts—That \$2.00 of the Hudson Bay special be given for singing, \$3.00 H. R. for the parade and \$2.00 of the T. Eaton special for Physical Training.

Wilson, Rosenau—That \$7.00 balance from Eaton special and the \$6.00 Simpson special be put in the general fund.

Langley, Mrs. Shier—That the Royal Bank Medal be given to the boy or girl winning the highest number of points in classes 1-43.

Mrs. Shier, McDonald—That the 4-24 lb sack of Purity flour be applied on classes 50, 55, 60 and 61 as first prizes. We adopt scale 2 for poultry.

McDonald, Langley—That all the classes not specially mentioned be paid on the pt. system.

Britton, Langley—That the Sec. write to Mr. Scott in regards to judges other than those supplied by the dept.

Coutts, Mrs. Shier—That the committee to look after the arranging of the hall be Messrs. Aitkens, Langley, Rosenau and McDonald.

Langley, McDonald—That the Sports committee be Messrs. Coutts, Wilson, Elford and Meeres.

Aitken, Britton—That the Sports committee look after the singing, physical training and yardage.

Langley, Rosenau—That Mr. McDonald be a committee to look after the poultry.

Coutts, Wilson—That the hall committee be as follows: vegetables, Mr. Britton; Manual Training, Mr. Wilson; School work, teachers of Cons. School and rural teachers.

Cooking, Mrs. Chapman and Miss Duff, Sewing, Mrs. Shier, Coutts, Langley—That Mr. Marey and Mrs. Shier be a reception committee.

Rosenau, Mrs. Shier—That Mrs. Isister be a committee to look after the cocoa on the day of the Fair. Cocoa and sugar to be supplied by the Chinook Cons. school.

Mrs. Shier, Coutts—That the meeting adjourned.

N.B.—That all cooking must be done according to the recipes in the School Fair Book.

### Here and There

Reduced fares to cover the Labor Day week-end from Aug. 31 to 12 noon Monday, Sept. 3, have been authorized on the Canadian Pacific Railway between all stations in Canada. Round trip tickets will be at the rate of fare and a quarter and will be good until midnight, Tuesday, September 4.

Returning from White City, London, Eng., aboard Canadian Pacific liner Montcalm, the athletes who represented Canada at the British Empire games came back practically in a body to the new city of around 100. They sailed for England aboard the Duchess of York July 20.

Australia is showing very substantial evidence of recovery with continued betterment in sight, is the view of John P. Brophy, Commonwealth Trade Representative at New York, stated when interviewed aboard S.S. Niagara on arrival recently at Victoria.

Fifty per cent. ahead of last year in mid-August with prospects for balance of season exceptionally good for the Canadian Pacific hotels and resorts in the Rockies is reported by A. E. Robertson, assistant general manager, in charge of the Company's western hotels.

Prominent British parliamentarians are visiting the Western Provinces this year, including Prime Minister J. Ramsay MacDonald. The Canadian Pacific liner Montcalm recently carried as a passenger Dr. E. Leslie Bustin, M.P., parliamentary secretary of the British Board of Trade, who will stay at St. Andrews-by-the-Sea, Saint John and Digby, N.S.

Canadian Pacific flagship Empress of Britain obtained a new record recently for the Quebec-Cherbourg Atlantic crossing, making the trip in four days, six hours and fifty-eight minutes, being thirty-four minutes under her own previous record set in August, 1932.

Montagu Norman, governor of the Bank of England, whose evasive tactics have given newspaper men some strenuous times in the past few years, actually posed for a photograph aboard Canadian Pacific liner Duchess of Bedford on his return to England recently. "Wait till I get my hat on straight," was his comment to the astonished and gratified photographer.

Railway building is by no means at an end in Canada. E. W. Easty, K.C., chairman and president of the Canadian Pacific Railway, stated recently following an extended inspection trip through Western Ontario. "Completion of our development will probably mean construction of more railway mileage to outlying districts as prospects and development warrant," he said.

### Esquimo Trial Is Short

#### —Jury Finds Native Is Guilty, Manslaughter

Five-Year Sentence Imposed—Will be Served at Aklavik

Found guilty of manslaughter, at Coppermine, N.W.T., last Friday, Ahligak, an Eskimo native of King William Island, was sentenced to five years imprisonment. Ahligak was charged with the murder of Anirugak, another native, following a jealous quarrel over the latter's preference for the accused man's wife.

Sentence was pronounced by Magistrate J. M. Douglas, who traveled 1,300 miles by aeroplane to preside at the impromptu court. Native witnesses testified that Ahligak, who blamed his friend for alienating his wife's affections, shot him down in a fit of jealousy in front of the igloo they occupied.

The term is to be served at Aklavik.

The verdict was reached after a trial which lasted most of the day. O. M. MacLeod, formerly of Hanna, acted as Crown Prosecutor and L. W. Cairns of Edmonton as defence counsel. The jury of six consisted of a prosecutor, a radio employee, trapper and three Hudson Bay employees.

Mr. MacLeod told of the accused's arrest by Corporal J. White at Cambridge Bay, in the autumn of 1931. Ahligak, he said, admitted killing his friend, who shared a snow house with him. Corporal White later found the body of Anirugak, and several articles of clothing were placed on record as exhibits.

Obocoongak, another witness, testified the assault was the result of a primitive triangle. Ahligak's wife, he said, had transferred her affections to Anirugak and refused to return to her husband.

The shooting occurred several months later and the family then moved away fearing the spirit of the dead man might return to do them harm. Mr. Cairns pleaded the unwritten law "which prevails alike in palace and igloo." He urged the jury to remember a verdict of manslaughter would relieve the responsibility for imposing drastic punishment.

## Big Canadian Firm Celebrates Diamond Jubilee

Founded by George and Mathew Beatty on June 18, 1874 and with agencies, warehouses, offices or depots across Canada, in New Zealand, the United Kingdom and fifty other countries, the well-known national and world-wide exporting house of Beatty Bros., manufacturers of washing machines and farm implements, celebrated its diamond jubilee at Fergus, Ontario, location of the head office of the firm, this month. A Canadian Pacific special train brought 200 agents from all over Canada, including two from Great Britain, to take part in the demonstration. An interesting program was thoroughly appreciated and enjoyed.

Leaving shows arrival of the special at Fergus with insets of W. G. Beatty and M. J. Beatty, respectively president and vice-president of the firm.

### WHEAT SITUATION IS IMPROVING

For the next three months wheat from the Canadian prairies will be pouring on the market. There will not be the volume shipments that a year of average production brings forth for this year's wheat crop is obviously a small one. At the same time there will be a considerable amount of wheat marketed, and it is now apparent that its weight will be felt insofar as prices are concerned. Judging from the market's performance during the past week there does not seem to be a sufficient volume of buying to take up the hedges offered. This situation may possibly change as the season advances, but some measure of apprehension is now felt throughout the west.

Actually the supply and demand situation throughout the world is in a much more favorable position than it has been for several years. There is no question but this year's world crop is a short one, and also that there will be an active demand for Canadian wheat. The fact that one high international wheat authority has suggested the world will call upon Canada for 288 million bushels of wheat during the crop year is encouraging. That is nearly a hundred million bushels more than the volume of wheat exported from the Dominion during the past, crop year. Such a large exportation would materially clear up the burdensome wheat surplus of this country.

The big carryover of wheat throughout the world during the past few years has been a strong factor in preventing a return of better times. The persistence of the over supply kept prices down and made wheat growing so unprofitable that the purchasing power of the wheat farmer was greatly reduced. With a large percentage of the carryover eliminated better prices will naturally follow and purchasing power be restored.

In the meantime it is to be hoped that the Winnipeg wheat market stands up against the volume of deliveries from the prairies. It would be unfortunate indeed, if the western farmer would have to take much lower prices for his product in this year when crops are short and the need or money so urgent.

### PUBLIC NOTICE

To The Ratepayers of the Collingwood M. D. No. 243.

The Council have decided to have a council meeting on Sept. 15, at 1:30 o'clock in the afternoon asking all ratepayers to come and let them know what they will be able to do re taxes. The reason being the school situation and all other services will be difficult to finance. The council feeling if this is done it will save the expense of seizures.

### WHO RUNS THE COUNTRY?

(By Bert Huffman)

When the federal government applied the sugar tax the price of sugar was around six cents per pound. The added two cents per pound in the tax increased the price of sugar to the consumer by 33 1-3 per cent.

Every family, rich and poor, needed and used sugar. It is a vital necessity to growing children, a vital necessity to housewives in preparing winter fruits for the family, a vital necessity on every table, in every home of the Dominion.

Hundreds of thousands of sincere protests were sent to Ottawa against imposition of this tax on one of our most universal needs. But all of these protests were unavailing. The tax stuck.

When the government recently, tardily, decided to tax the rich gold mine owners a paltry 10 per cent, what a howl went up from these multi-millionaire mine owners—just a handful of them! And the Dominion government immediately reconsidered its gold tax.

All the teeth were drawn from the gold tax law, its claws were pared to be quick, its provisions were "tempered to the shorn lamb" of the gold mine owner. The gold tax, as finally imposed, was trimmed to the needs of these powerful corporations. They told the government what they would stand for, and the government revised its bold law to fit that peremptory order.

Remembering the unjust sugar tax on the households of the poor and helpless, one can only wonder who actually runs this country, the mass of the sugar consumers from coast to coast, or the handful of rich and powerful mining companies? To which class did the federal government make the most ready response?
